WEIGHT .....	620 kg

#### DATADIMENSION - V

##### STANDARDS

UNI EN ISO 10545-2

##### DESCRIPTION

Laboratory instrument for determining the dimensional characteristic in the tiles (length, width, straightness of sides, rectangularity, surface flatness). The thickness is calculated by isothickness instrument. The measuring takes place by difference between the reference calibration plate (supplied with measures on customer demand) and the ceramic tiles to be tested. The instrument is used by means of a common notebook or Tablet and the data acquisition is fully automatic. The instrument is equipped with PC/Tablet and software that running with Windows XP/Vista/7.8.1 for acquisition, calculation of tile dimensions, recording and link to printer as requested by ISO 10545-2 standards.

*Deletes the measurement errors arising from the weight of the sample strength  
Wireless data transmission.*

##### TECHNICAL SPECIFICATIONS

- Wireless digital gauge, readability 0,01 mm
- Rapid gauges positioning
- Wireless data acquisition

##### EQUIPMENT

- 6 Wireless Digital gauges, readability 0,01 mm
- CD Software ISO 10545-2 for PC Windows XP/Vista / 7/ 8.1 or tablet
- Software license key
- USB-Wireless communication key
- Set of 3 support
- Notebook or Tablet complete with O.S. printer and software ISO 10545-2
